

The selection process

Based on the applications DBU invites the best candidates to a selection interview in German or English in their native countries. Dates are announced well in advance. All fellowship approvals are decided upon by a selection committee.

Your obligations as a fellow

The fellowship recipients commit to participate regularly in the seminars, submit reports, to update their data in the online communication platform, to develop their German language abilities and to give notification of any changes relevant to the grant conditions.

No work permit is needed for the fellowship stay in Germany. For the right of entry into Germany, however, some states require a visa. Fellowship recipients must apply for visa themselves in their native countries.

Presenting results at a seminar

Your stay in Germany

DBU can support finding a host institution in Germany. Own initiative of the applicants is highly appreciated. The commitment of a host institution must not be available at the time of application. With the help of the DBU a host can be organized after the positive application process. The host institutions provide the workplace and guarantee professional supervision.

The fellowship begins for all new fellowship recipients with an introductory seminar in Osnabrück, at which important organizational matters regarding the stay in Germany are explained. Afterwards the several weeks lasting German language course in Osnabrück takes place.

DBU coaches its fellows during the whole stay. During seminars the fellowship recipients can present their topics and their results and network with each other. Furthermore, DBU welcomes and supports individual initiatives to organize further professional events and seminars.

DBU – we support innovation

The German Federal Environmental Foundation (Deutsche Bundesstiftung Umwelt, DBU), in accordance with its foundation goals and mission statement, supports innovative, exemplary and solution-oriented proposals for the protection of the environment, with special consideration for the needs of small and medium-sized enterprises.

Projects seeking support should be intended to produce sustainable practical results, serve to provide a stimulus, and lead to a »multiplier effect«. It is the objective of the DBU to contribute to the solution of current environmental problems, in particular, which result from unsustainable business practices and lifestyles. The DBU sees its crucial challenges primarily in the areas of climate change, biodiversity loss, unsustainable use of natural resources, and harmful emissions. The support subjects and related projects are tied to both current scientific findings regarding planetary limits and to the United Nations' Sustainable Development Goals.

Fellowships for graduates from Central and Eastern Europe (CEE)

in Germany with environmental relevance

Fellowship recipient at sample processing

Alumni on excursion in Poland

Formal requirements

- citizenship of Bulgaria, Estonia, Kaliningrad Oblast, Latvia, Lithuania, Poland, Romania, Slovakia, Czech Republic, Ukraine, Hungary, the Balkan States: Albania, Bosnia and Herzegovina, Kosovo, Croatia, Macedonia, Montenegro, Republic of Moldova, Serbia, Slovenia
- residence in one participating CEE-country at the time of application
- above-average (good to very good) degree of one participating CEE-country (Master or Diploma)
- all disciplines are eligible
- at the time of application, the degree should generally not have been completed more than five years ago
- PhD students are eligible if the PhD thesis is not completed during the fellowship
- proposal of an environmental relevant and applied topic
- sufficient knowledge of the German language; needs to be proven at the beginning of the stay at the host institution

Your application

The application takes place via an online tool in German or English and is possible twice a year. The application deadlines are the same in all countries – annually on 5 March and 5 September. You can obtain detailed information on your home country under www.dbu.de/en/promotion/moe-fellowship

The following documents are needed for online application in German or English:

- resume
- description of a topic of environmental protection or nature conservation you would like to work on in Germany and which is of environmental relevance for your home country, the EU or globally
- copies of university certificates (master, diploma, bachelor)
- written statement by an academic advisor from the home country; alternatively by a supervisor
- German and/or English language certificate

Fellowship recipients during a city tour

Our services

- funding period: 6–12 months
- monthly grant: 1 350 Euro; exempt from tax and social security contributions in Germany
- health, accident and liability insurance
- several weeks of intensive German course in Osnabrück

Our aims for the CEE fellowships

The DBU awards up to 50 fellowships per year for advanced qualification in all fields of environmental protection and nature conservation. Highly qualified graduates of all disciplines from the countries of Central and Eastern Europe (CEE) are welcome to apply. The DBU fellowships cover a 6–12 months stay at German host institutions: universities, research institutes, companies, environmental- and nature protection agencies and authorities, NGOs, associations etc.

During the fellowship practical solutions for current environmental issues are developed. After their stay in Germany the alumni are well qualified to tackle these issues in their home countries thus assuring efficient knowledge transfer. Working closely together in an international context helps to breakdown existing barriers. The acquired contacts will create a strong network of highly committed environmental experts.
